

Performance

The brain and brawn to tackle the toughest tasks

Glide Steer

This revolutionary technology enables the GR2120 to turn so sharply, it leaves only a 100 cm circle of uncut grass. Our unique Glide Steer feature makes cutting around trees, poles, and other narrow objects extremely efficient. Plus, because the inner rear wheel spins freely when turning, the grass is not damaged.

1 When driving in a straight direction, the GR2120 provides outstanding traction with its Allwheel drive, even on slopes.

2 For the sharpest turn possible, both the front wheels turn an incredible 70° at which point the inside rear wheel spins freely.

3 By spinning freely, the inside wheel does not damage the grass. Once the front wheels are straight, it resumes All-wheel drive.

Powerful Kubota engine

Tapping Kubota's legendary heritage of formidable engine designs, the GR2120 is equipped with a 21-horsepower, 3-cylinder diesel power plant. It generates a high torque rise that easily handles hours of heavy-duty mowing, even in long, wet grass, with a grass collector mounted.

Ultra-durable shaft drive

Unlike the belt-drive system utilised in gasoline mowers, our shaft-drive transmission, shaft-drive PTO, and hydraulic PTO clutch are incredibly durable and worry-free.

Specifications

Model	GR2120	GR2120S
Engine		
Model	Kubota D782-E3-GX	
Type	3 cylinder, diesel, water-cooled	
Total displacement	cc	778
Gross horsepower according to SAE	kW (PS)	15.6 (21.0)
Engine layout	Horizontal	
Fuel tank capacity	l	18
Dimension		
Overall length	mm	2880
Overall width	mm	1280
Overall height	mm	1230
Wheelbase	mm	1280
Tread		
Front/Rear	mm	825/800
Weight (w/mower and grass collector)	kg	515
Tyre size		
Front/Rear	16x7.5-8/23x10.50-12	
Transmission	Hydrostatic transmission	
Transmission drive	Shaft drive	
Speed control	Single foot pedal	
Front-wheel drive	Glide Steer	
Travelling speed		
Forward/Reverse	km/h	0-10.0/0-5.0
Brake	Internal expanding brake	
PTO clutch	Hydraulic wet multi discs	
Mower deck drive	U-joint shaft	
Steering system	Glide Steer, fully hydraulic power steering	
Operator's deck	Flat	
Seat adjustment	Slide	
Seat suspension	Parallel linkage	
Fuel gauge	Std.	
Hour meter	Std.	
Easy checker	Std.	
Mower OPC.	Std.	
Travel OPC.	Std.	
Blade shut off brake	Built-in clutch	
Mower shut off when collector open	Std.	-
Grass collector		-
Capacity	l	450
Dumping system	Manual	-
Material of bag	Fabric/Steel	-
Optional accessories & implements		

Mower Specifications

Cutting width	inch. (m)	48 (1.22)
Mower system	Direct chute	Side discharge
Mower blade drive	V/hexagonal belt	V belt
Lifting device	Hydraulic	
Mower mounting method	Quick attach	
Cutting height	mm	25-102
Cutting height adjustment	Dial	
Cutting height position	11	
Number of blades	3	
Direction of rotation	2 clockwise viewed from operator, 1 counter clockwise	clockwise viewed from operator
Minimum uncut diameter	m	1.0
Mower deck ground clearance	mm	135
		140

KUBOTA DIESEL RIDE-ON MOWER

GR

GR2120/GR2120S

Comfortable and robust loaded with professional features, the GR2120/GR2120S gives you first class results every time.

NEW

Extreme maneuverability by revolutionary technology

GLIDE STEER

Comfort, functionality and design- the GR2120 is exactly the right

At the end are the results.

This high-end ride-on boasts our unique Glide Steer, an innovative Direct Chute System, a 21-horsepower engine and a newly designed grass collector.

Test drive the GR2120 today and experience unmatched performance in both efficiency and final finish.

Fatigue-reducing power steering

Feather-touch power steering enhances manoeuvrability, reduces fatigue, and makes operating the GR2120 possible for virtually anyone.

Versatile HST transmission

Kubota's reputable and versatile HST transmission is easily controlled by a single foot pedal and produces a maximum travel speed of 10km/h.

Suspension seat/full-flat deck

Oversized and generously padded, the GR2120's parallel linkage suspension seat can be adjusted to provide a high level of comfort to a wide range of operators. Its full-flat deck minimises operator fatigue by offering plenty of legroom.

Perfect cut

Our Direct Chute System and new side-discharge mower ensure professional results.

The GR2120's Direct Chute System efficiently cuts and channels grass straight back into an integrated rear grass collector. The deck's cutting width is an ample 48 inches, and thanks to its centre-discharge configuration, you can execute tight, tree-hugging turns in either direction. For those who prefer a side-discharge mower, the GR2120S's mower deck is constructed of durable 10-gauge steel and is designed with a 127 mm deep shell. Whichever system you choose, you'll be assured professional and lasting results.

Side-discharge Mower

Maximum comfort

The sophisticated grass collector design makes catching and dumping grass easy.

The grass collector on the GR2120 maintains a large capacity, yet, is lighter, easier to empty and utilises innovative mower technologies to prevent clogging.

Large capacity grass collector

The 450-litre grass collector has been made lower and longer to minimise clogging and reduce time between dumping. The collector also boasts lighter materials for easier handling.

Easy emptying

A gas-spring assist mechanism on the collector lever used for dumping makes lifting, even a full basket, easy. The lid of the collector opens wide, making maintenance easy work.

Well-designed duct

A handy electronic sensor is added to signal when the collector needs to be emptied. The wide duct leading from the mower deck is designed to move grass smoothly. A lever on the side of the tractor allows the operator to expel excess grass from the duct without leaving the tractor seat.

Easy reach cutting height adjustment dial

Deck cleaning pipe for connecting water hose

Hydraulic mower lift lever

Ultra-durable, long-life hexagonal belt

Rear Deflector

An optional rear deflector is available for times when you choose not to use the grass collector. This deflector discharges grass and dust directly onto the ground and easily attaches to the end of the duct, which leads from the mower deck.

Extreme maneuverability by revolutionary technology

GLIDE STEER
